WEATHER SYNOPSIS BY REGION

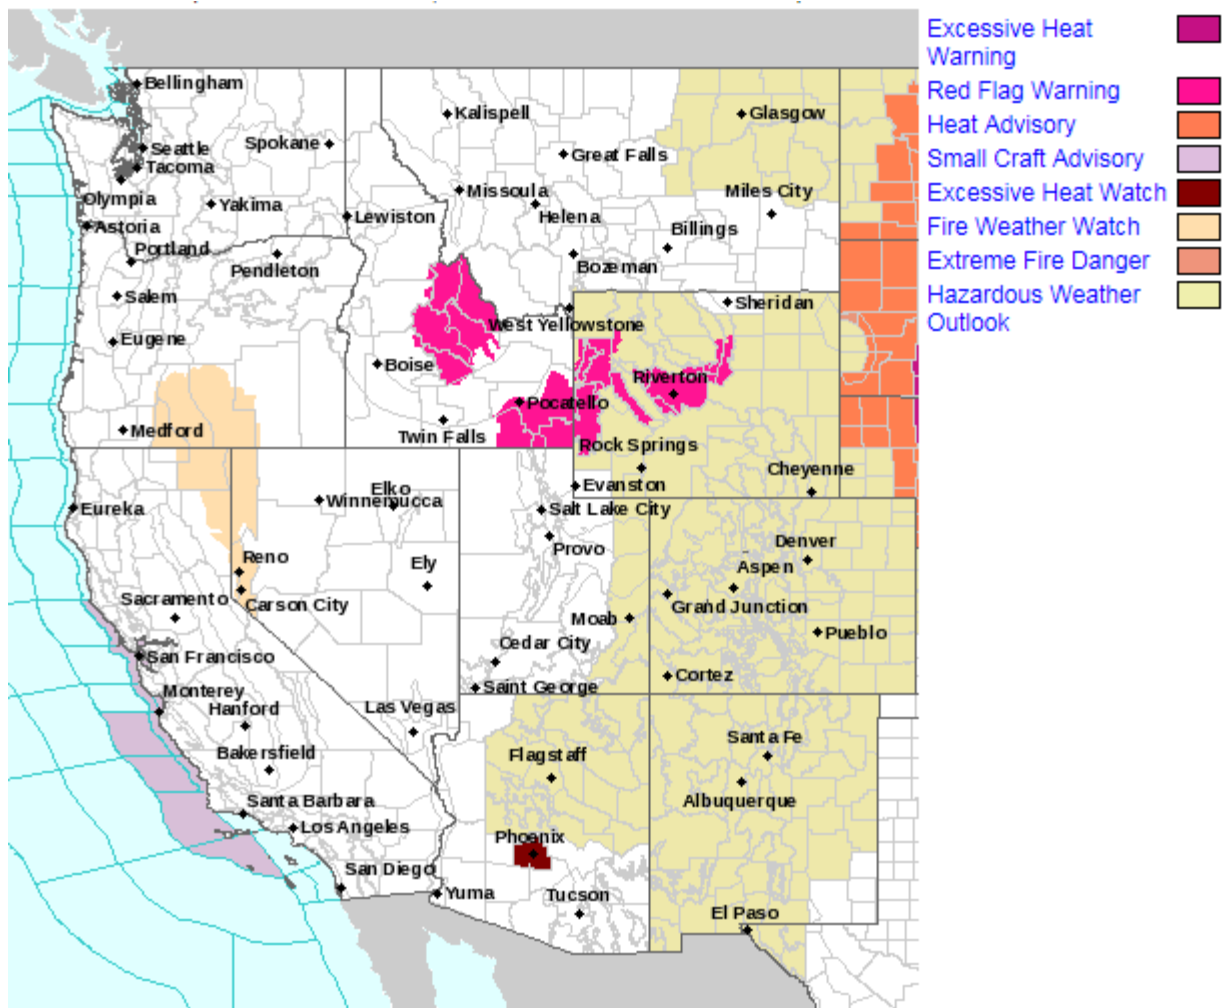

NORTHERN CALIFORNIA

A low pressure trough over the Pacific NW coast and just off the California coast will slowly give way to higher pressure over the next few days with well below normal temperatures persisting. The trough will linger for a few more days and finally move NE out of the region Thursday when it will again bring more wind to the eastern areas and a slight chance of afternoon and evening thunderstorms to the far north. Friday into early next week, high pressure will expand over the region with much warmer temperatures and continue the dry/low RH conditions of late. The warmest inland valleys will have afternoon highs 105-108 Monday and many areas will see rather poor overnight RH recovery. Any thunderstorms that develop this week are most likely to produce rather light rainfall with a mix of wet and dry lightning. S to SW winds in the eastern areas today and Wednesday are expected to be quite seasonable with the strongest afternoon gusts to about 30 mph. RH will be seasonably low there as well. Winds Thursday across the Modoc Plateau and for the higher terrain of the Sierra (5000'+) eastward into NW Nevada are expected to gust to around 40 mph with low RH be on the order of 8-14%. After Thursday, winds will be light northerly overnight through the mornings followed but typical, local terrain driven summer afternoon winds each day.

SOUTHERN CALIFORNIA

High pressure centered over the central part of the country will shift westward bringing a couple degrees of warming each day through Friday. The strong area of high pressure will be directly overhead Friday through early next week causing temperatures to be around 10 degrees above normal away from the immediate coast. Minimum humidity will be mainly in the teens away from the coastal areas through Wednesday and then there will be widespread single digit minimum humidity away from the coastal areas Thursday through early next week. Southwest to west afternoon winds of 15 to 25 mph will continue to surface across the desert slopes and desert passes through Wednesday. Northwest to north nighttime winds of 15 to 25 mph will then surface over the mountains of Southern California from the Santa Ynez Range eastward to the I-5 corridor as well as over the Tehachapi Mountains Thursday through Saturday. Winds will become fairly light across the entire area Sunday through early next week.
